

Claims

1. A combination fish scaling and dressing device, comprising a handle, a retractable and extendible blade in said handle, the exterior portions of said handle having roughened surfaces thereon.
2. A combination fish scaling and dressing device, as set forth in claim 1 in which said handle has blade supporting and protecting means extending therefrom.
3. A combination fish scaling and dressing device, as set forth in claim 1 in which said roughened surfaces on said handle portion comprise a series of individually attached scaling members.
4. A combination fish scaling and dressing device, as set forth in claim 1 in which said roughened areas on said handle are formed integrally with said handle.
5. A combination fish scaling and dressing device as set forth in claim 1 in which said retractable and extendable blade is activated by a thumb slide on said handle.
6. A combination fish scaling and dressing device comprising a handle and a fixed open blade, and a roughened area on a portion of said handle.
